## PROFESSIONAL SUMMARY

I am a recent graduate with a strong passion for software development, particularly using Flutter and Android Studio for building Android apps. My experience includes working with Java JDK 8, Python, and Git to develop and manage projects. I possess a basic understanding of AWS cloud computing and have experience collaborating effectively in a team environment using Git. I am a highly motivated learner who enjoys staying up-to-date with the latest advancements in technology.

---

## KEY COMPETENCIES

IoT Expertise	Good communication skills with	Proficiency in Java, Python, Kotlin, SQL
Android Studio expert	Cantonese, Mandarin, English &	Critical thinking
Problem Solving	Japanese – N1	

---

## PROJECT

### Graduate Project – IoT app with ESP32 Sensor & TPLink IOT Device

- As team leader of the project team of 4 persons, set up a target to control the cross-brand home appliances with an Android-based application
- Implemented an API using Django REST Framework for app-server communication.
- Utilized SQL database for data storage and retrieval, to connect with ESP32 Sensor and TPLink IoT device.
- Achieved control of all home-based appliances.

### Flutter Project – Android application for share files

- As a group member of the team, develop an application that lets users share files through this app and QR Code.
- Write the method to handle the file upload to private cloud for hosting
- Design the UI of the app.

### Doncaster Chinese Christian Church website – use React and Vite

- Developed and maintained the Doncaster Chinese Christian Church website using HTML, CSS, and JavaScript for a responsive and user-friendly design.
  - Implemented dynamic features such as event calendars, contact forms, and interactive elements to enhance user engagement.
  - Deployed and managed the website on Zeabur for reliable and scalable hosting.
  - Collaborated with church leaders to ensure content accuracy and alignment with the community's needs.
- 

## EDUCATION

### Tamkang University, Taiwan

09/2019 – 06/2023 BBA in Information Management, Minor in Japanese of excellent academic performance and good behavior
